Official Launching of the Academy of Security, Intelligence and Risk Studies

We are extremely pleased to announce the official launch of the Academy of Security, Intelligence and Risk Studies (ASIRS) as a Private Education Institution (PEI) with the Committee of Private Education (CPE), with the registered number as 201410743C.

This is an important milestone in the continuing growth and success of our organisation. We are currently a licensed PEI, indicating our commitment in providing the highest levels of quality trainings and education to enhance the competency of working professionals. This signifies that we have met the rigorous standards of a national regulator in Singapore. The Academy is also registered under the Private Education Act that provide for the regulation of private education institutions so as to ensure the provision of quality education.

We are extremely honoured to receive the recognition and intend to consistently uphold the principles of quality improvement in the future. We will be rolling out diploma courses for working professionals beginning with the Diploma in Anti & Counter Terrorism Studies, followed by Diploma in Corporate Security Management Studies very soon. On the other hand, we will also be revising the price for short term certificate courses starting from 15th November 2020 onwards. Those who signed up for courses before 15th November are therefore not affected.

We would like to extend our deepest gratitude to all of our members who have been closely associated with us so far. We commit to continuously pursue our core value by working towards improving the standard quality of trainings and contribute to the industry. For any enquiry, you can drop an email to enquiries@asirs.org or give us a call at (65) 6514 9648.

Warmest regards,

Derick Ding
Director
Academy of Security,
Intelligence and Risk Studies
